PROFESSIONAL EXPERIENCE

Sadja Web Solutions, Kampala - Uganda

Front-end Web Developer(internship) | August, 2023 - March 2024

Web, App, Server Development Agency

- Assembled and addressed technical and design requirements, effectively integrating user-facing and front-end elements to maintain web presence effectiveness
- Authored reusable components and created prototypes to streamline the development process and ensure code reusability
- Utilized React, TypeScript, Next.js, and Material UI to develop responsive and visually appealing features and pages for both mobile and desktop platforms
- Collaborated closely with stakeholders during development processes to confirm creative proposals and implement design best practices, resulting in a cohesive and visually captivating web interface

RELEVANT PROJECTS

Tailwind Study

Freelance Web Developer
A website clone of "ReturnQueen" with similar design and functionality.

- Created a fully functional replica of ReturnQueen website using React, Next.js, SASS, and Typescript, showcasing proficiency in frontend web development.
- Implemented responsive design principles, ensuring a seamless and visually appealing user experience across diverse screen sizes and devices
- Leveraged TAILWIND CSS to efficiently manage and organize CSS code, promoting maintainability and scalability
- Employed version control with Git and GitHub, enabling efficient collaboration and codebase integrity tracking throughout the development process

Apple Notes

Freelance Web Developer
A web application clone of the notes app from MacOS with similar design and functionality.

- Implemented user authentication features, including login and sign-up functionalities, to ensure secure access to the app
- Created a seamless CRUD functionality, enabling users to effortlessly create, view, edit, and delete their notes

EDUCATION

Uganda Institute of Information & Communications Technology   **April 2021 - November 2022**

Associates, Computer Science
